

Spacious – come rain or shine

KARSTEN TENTEN  
SINCE 1981

NEW

## The Karsten **Lacerta**: a surprisingly versatile family tent

Whether it's pouring with rain or the sun is shining in a cloudless sky, in the Lacerta, you'll find it doesn't matter. The tent fits the whole family, comes with a sturdy, spacious awning as standard, and is easily expandable, using an extra removable wall and ground sheet. Create lots of space inside the tent within the blink of an eye.

### **More living space**

The Lacerta is a true Karsten Tent: modern, stormproof and pitched in no time. New in this design is the adaptable living space. When the weather's good, the capacious awning and over 15m<sup>2</sup> interior provide ample room. During rainy weather or when you feel a need for more living space, it's super-easy to use the awning to create an extra compartment: By using the removable wall and extending the ground sheet, the living space can be increased to a whopping 24m<sup>2</sup>. The Lacerta really does offer the ideal starting point for a camping trip with the whole family!

### **More storage space**

Need more storage space? Our designers have thought of that, too. The Lacerta's zip-in storage unit is high, deep and sturdy, but folds up for easy transport. It offers a surprising amount of room for everything from clothes and towels to cutlery and board games. You'll never have to search for that T-shirt or plate again, thanks to its clever design!

### **A good night's sleep**

Lacerta's headroom of over 2.2m along the entire length of the tent ensures that even taller people can easily find their way from

the living space to the sleeping compartment without complaint. The sleeping compartments themselves are as deep as they are high, and their spacious design ensures you have enough room for storing your things or changing clothes. What's more, the ventilation grids in the top part of the dividing walls create an optimal air flow throughout the tent, ensuring every member of the family will sleep like a baby and awake feeling fresh and well rested.

### More time for fun

Being a Karsten Tent, the Lacerta is pitched in no time. It features pole sleeves on the outside for easy assembly. Open the sleeves using the zip, feed the preformed poles through the sleeves and zip the sleeves closed. Ta dah! The tent is pitched, and it won't go anywhere any time soon. Its solid construction, 100% Ten Cate cotton canvas and bisonyl ground sheet make this tent exceptionally storm-resistant and rainproof. Once again, with the Lacerta, Karsten guarantees countless carefree camping holidays for the whole family.
